COLLECTION

Our Doors

The choice you make in selecting your new insulated composite door is important, as you want it to serve you well for many years to come.

Appearance

Your door must look good and be aesthetically pleasing. Think about:

- Door Style
- Door Colour
- Choice of Decorative Glass

Security

All important in protecting your home from unwanted visitors. You need:

- Impact resistant GRP with rigid polymer subframe
- High-density polyurethane foam core
- Proven to PAS24 Security standard, essential for achieving 'Secured by Design' endorsement*

Weatherproof

A must to keep the elements at bay! It must have:

- A waterproof door leaf
- A high performance, weather resistant, glazing system
- Weather performance, proven to BS6375 - 1 Classification, for weather tightness, air, wind and water

Heat Insulation

Keeping your home insulated and your bills down. You require:

- A high performance insulating core
- High performance insulated glass units
- A door that exceeds Approved Document L of the Building Regulation requirements

Sound Insulation

Protecting you from external noise. It must have:

- Baffling against noise with a high performance insulating core
- At least Outdoor-Indoor Transmission Class (OITC): 26db
- At least Sound Transmission Class (STC): 29db

Durable

A door with pedigree - tried and tested for over 20 years. It needs:

- Strength from its construction
- High impact resistant door skins
- Stability, whatever the weather conditions

Textured Backing Glass

We recommend that a textured backing glass is used with our Diamonds and Fleur glazing designs, to add an extra privacy. We offer the complete range of Pilkington textured glass and these can also be specified for use with our side panel and top light frames.

PILKINGTON

Integral Venetian Blind

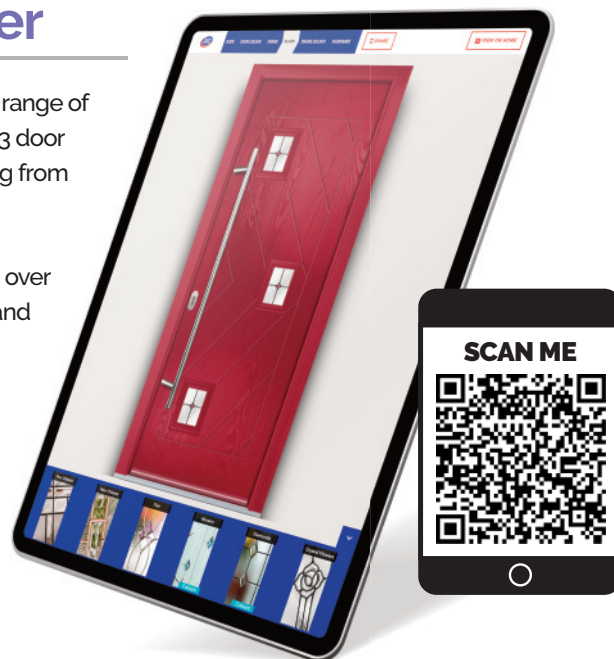

This blind is cleverly encapsulated within the insulated glass cavity of the door to provide a zero maintenance blind. It can be raised, lowered and easily tilted using the unobtrusive fingertip control on the edge of the frame. It is also left or right handed, allowing it to be raised and tilted by control tabs on the hinge side of the door so as not interfere with the operation of the door handle.

Interactive Door Builder

Our interactive door builder can incorporate the full range of decorative glass from our catalogue, as well as all 43 door colour options into more than 30 door styles, ranging from traditional to contemporary.

We calculate that the Door Configurator can design over 10,000 different combinations of glass, door styles and colours, providing several features not available on any other door configurators in the market, such as the ability to view the door on a range of standard entranceway backgrounds or with the customer's own property photograph; and a useful tool to send the configured door design via email to be recreated on the recipient's browser.

How to Keep Your Door Looking Great for Longer

To prolong the life of the surface, a small amount of care and attention is needed. How often will depend on where you live. In a coastal or heavily industrialised area or near a main road, cleaning may need to be more often. We recommend that you only use warm soapy water (washing up liquid is suitable) with a lint-free cloth and wipe dry with a soft clean cloth.

PLEASE DO NOT...

- Use abrasive cleaners or scouring pads
- Use pressure washers or steam cleaners
- Apply any type of bleach or solvent
- Apply any adhesives of any type or tack
- Have any contact with any sharp objects
- Use WD40

If your door suffers accidental everyday damage, such as dents or scratches, then various surface maintenance kits are available.

MG

Due to the limitations in photographic and printing processes, actual colours may vary from those illustrated in this brochure and should be used for guidance purposes only.
